

24th International Symposium on Fluorine Chemistry (24th ISFC)

July 28 – Aug 02, 2024, Shanghai, China

<https://24isfc.casconf.cn/>

(1st round Announcement)

Join us for the 24th ISFC:

- Learn from global experts from academia and industry who will share the latest advances in fluorine chemistry.
- Present your own research and share ideas with international researchers in an intimate and relaxed environment.

[Submit abstracts by 31 May 2024](#)

[\(Early bird registration ends on Tuesday, April 30, 2024\)](#)

Scope of Conference

The theme of the conference is “**FluoroChem, Better Life**”. The objective of the conference is to bring together the thoughts and wisdom, and to share the frontiers in fluorine synthesis from academic and industrial experts all over the world.

Topics include

- New reagents, reactions, catalysts, strategies and concepts for fluorine chemistry
- Stereoselective synthesis and asymmetric catalysis of fluorine chemistry
- Bioorganic chemistry and chemical biology of fluorinated compounds
- Drug discovery and medicinal chemistry of fluorinated compounds
- Physical and computational methods in fluorine chemistry
- Organofluorine materials chemistry
- Energy and environment technology

Organizers

Jinbo Hu, Shanghai Institute of Organic Chemistry, China

Xingang Zhang, Shanghai Institute of Organic Chemistry, China

Qilong Shen, Shanghai Institute of Organic Chemistry, China
